INDEX.

PAGE

Algol—
The System of Algol; paper by Miss A. M. Clerke 86

Ant—
What is an Ant? by E. A. Butler 27
The Life of an Ant 43, 76
Ants' Companions 94, 104

Atlantic—
The Currents of the North Atlantic; by Richard Beynon 155

Atmosphere—
The Moon's; article by A. C. Ranyard ... 50

Atomic Weight—
J. S. Stas's Researches as to... 74

Auriga—
Theories as to Sudden Brightening of the Nova in Auriga 108

Backhouse, T. W.—
Letter as to the Existence of Dark Nebulous Masses 93

Ball, Sir Robert S.—
The Astronomical Explanation of a Glacial Period 1
Letter with reference to Sir R. Ball's paper 53

Barnard, Prof. E. E.—
The Great Nebulous Areas of the Sky ... 14
Photographs of Swift's Comet by 229

Barrett, T. S.—
An Error of Vega in calculating Logarithms 33

Bee—
Parasites of Bees; by E. A. Butler 126, 143, 164, 181

Beynon, Richard—
The Depths of the Mediterranean and Black Seas 116
The Currents of the North Atlantic 155

Binary Stars—
On the Origin of; by T. J. J. See .. . 81

PAGE

Bozward, J. Lloyd—
Observations of an Aurora in August, 1892... 171

Brester, A.—
Notice of his book, "Théorie du Soleil" .. 234

Brightness—
The Relative Brightness of the Planets; by J. E. Gore 35
On the Brightness of Nebulæ... 131

Butler, E. A.—
On Human Pediculi 16
What is an Ant? 27
The Life of an Ant 43, 76
Ants' Companions 94, 104
Bee Parasites 126, 143, 164, 181
Caterpillars 204, 226

Camphor—
Paper on Preparation of; by J. Ch. Sawer... 55

Cañons—
The Cañons of Colorado; by the Rev. H. N. Hutchinson 7, 29

Carbon—
The Chemical Element; by Vaughan Cornish 25

Cassini, Dominic
His Lunar Chart 11

Caterpillars—
Articles on; by E. A. Butler .. 204, 226

Chalk—
A Lump of, and its Lessons; by R. Lydekker 101

Chandler, Dr.—
His Theory as to the System of Algol .. 86

Christie, Robt. W. D.—
On Square and Cube Numbers 13

Clerke, Miss A. M.—
The Movements of the Stars 48
The System of Algol 86
On Planetary Nebulæ 148
The Movements in the Line of Sight of Stars and Nebulæ 209

683985

PAGE

Clerke, Miss Ellen M.—
Notice of her book, "Jupiter and his System" 211

Comets—
Periodical Comets due in 1892 71

Comets' Tails—
On the Forms of Comets' Tails; by A. C. Ranyard 229

Comet, Swift's—
Photographs of; by Prof. E. E. Barnard ... 229

Cooke, Dr. M. C.—
Notice of his book, "Vegetable Wasps and Plant Worms" 234

Cornish, Vaughan—
The Chemical Element Carbon 25
Chemical Researches of Jean Servais Stas ... 74
The Classification of the Chemical Elements 84
Article on *Phosphorus Mirabilis* 107
Some Facts about Explosives... 136
The Liquefaction of Gases 141
The Fuel of the Blast Furnace 183
Bye-Products *versus* Waste-Products... .. 208

Corona—
The Corona of the Sun and Stars 115

Crawshay, George—
On the Cause of Earthquakes 71

Currents—
Of the North Atlantic; by R. Beynon .. 155

Dark Nebulæ—
Letter on Dark Nebulous Masses; by T. W. Backhouse 93

Dark Tree-like Structure—
In the Milky Way; photographed by Dr. Max Wolf 192

Density—
Evidence as to the Density of the Orion and other Nebulæ 192

Earthquakes—
The Great Earthquake in Japan of 1891; paper by the Rev. H. N. Hutchinson ... 88
On the Cause of 13, 71, 145

Edridge-Green, Dr. F. W.—
Notice of his book on "Memory: Its logical Relations and Cultivation" 35

Elements—
Classification of the Chemical Elements ... 84

Elephants—
Recent and Extinct Elephants; by R. Lydekker 46, 64

PAGE

Espin, The Rev. T. E.—
On the Wolf-Rayet Stars in Dr. Max Wolf's Photographs of the γ Cygni Region ... 14
Letter on the Monochromatic Spectrum of the Nova Aurigæ in August, 1892... ... 170

Explosives—
Some Facts about Explosives; by Vaughan Cornish 136

Faculæ—
Photographs of Solar Faculæ; by Prof. G. E. Hale 169

Fishes—
The Oldest Fishes and their Fins; by R. Lydekker 173

Flint—
A Flake of, and its History; by R. Lydekker 195

Fry, The Rt. Hon. Lord Justice—
British Mosses... ... ... 4, 21, 41, 61
The Disaster at St. Gervais 201

Galactic System—
A Cluster principally composed of Stars giving the Sirian type of Spectrum. Note by A. C. Ranyard 49

Gases—
On the Liquefaction of Gases; by Vaughan Cornish 141

Glacial Period—
The cause of 1, 34, 52

Glacier—
Photographs of the Holes in the Têtes Rousses Glacier, the origin of the St. Gervais Disaster 201

Glacier Motion—
Paper on theories of; by the Rev. H. N. Hutchinson 66

Glew, F. H.—
On the Interval between Successive Flashes of Lightning 150

Gore, J. E.—
The Relative Brightness of the Planets ... 35

Grasses—
By J. Pentland Smith 185

Grover, C.—
Letter as to the Nebulosity occasionally observable around Variable Stars 115

Henry, MM. Paul and Prosper—
Photographs of the Moon by 50

PAGE

Hot Springs—

Article on; by Prof. J. Logan Lobley ... 95

Hull, Edward—

Notice of his book, "The Physical Geology and Geography of Ireland 12

Hutchinson, The Rev. H. N.—

The Cañons of Colorado 7, 29
Notice of his book, "The Story of the Hills" 12
Theories of Glacier Motion 66
The Great Earthquake in Japan of 1891 ... 88
How Old is the World? 161
The New Geology 216

Ice Age—

The Cause of the 1, 34, 52

Inwards, Richard—

The Cretan Labyrinth 194

Island Life—

Notice of Mr. A. R. Wallace's book on ... 151

Jameson, A.—

On Radiometers 138
Radiant Matter 176

Kent, Saville—

His book, "The Great Barrier Reef of Australia" 231

Kirby, W. E.—

Notice of his book on "Beetles, Butterflies, Moths, and other Insects"... 235
Letter on the Imperfection of our Knowledge of the Species of Insects 235

Lightning—

On Lightning Photographs; by A. C. Ranyard 149

Line of Sight—

The Movements in the Line of Sight of Stars and Nebulæ 209

Liquefaction of Gases—

Paper on; by Vaughan Cornish 141

Locock, C. D.—

Chess Column for each Month.

Logarithms—

Calculated by means of Tables of Proportional Parts... 33

PAGE

Lydekker, R.—

Elephants, Recent and Extinct 46, 64
A Lump of Chalk and its Lessons 101
Protective Resemblance in Animals ... 121
Ruminants and their Distribution 152
The Oldest Fishes and their Fins 173
A Flake of Flint and its History 195
The Oldest Mammals 212
Armadillos and Aard-Varks 221

Lynn, W. T.—

Periodical Comets due in 1892 ... 37, 71
The Wilson Phenomenon of Sunspots .. 236
Star Cluster near Sirius, observed by Aristotle 237

MacDowall, Alex. B.—

Statistics as to the Drinking Habits and Recent Trade of the Nation 232

Magnetic Storms—

The Connection between Sunspots and Magnetic Storms 68, 89

Mars—

Evidence as to Water Vapour in the Atmosphere of the Planet Mars 193
The Temperature of; letter from Prof. W. H. Pickering 113
The Climate of; by E. W. Maunder 167
Notes as to the Temperature of; by Prof. W. H. Pickering and A. C. Ranyard 194
Notice of M. Camille Flammarion's book, "La Planète Mars et ces Conditions d'Habitabilité" 211

Maunder, E. W.—

The Great Sunspot and its Influence ...68, 89
Article on the New Star in Auriga 108
The Distribution of Sunspots in Solar Latitudes... 128
The Climate of Mars 167

Max Wolf, Dr.—

His Photographs of the Milky Way—
About ζ Cephei... 12
About γ Cygni 14, 34
His Photographs of the Milky Way .. 131, 192

Mediterranean—

Article on the Depths of the Mediterranean and Black Seas; by R. Beynon... 116

Meteors—

Photographic Record of the Track of 34

XUM

PAGE

Michell, The Rev. John—

Life of; by J. R. Sutton 188, 206

Milky Way—

A Cluster of Sirian type Stars associated with Nebulæ 50
Probable Northern Drift of; suggestion by W. H. S. Monck 73
On the Distribution of Stars in; by J. R. Sutton 224

Monck, W. H. S.—

The Causes of the Ice Age 34
Stellar Spectra and Stellar Brightness ... 51
On the Cause of the Ice Age 52
Our Nearest Neighbours amongst the Stars 73
The Evolution of Double Stars, and the Eccentricity of their Orbits 132
On the Eccentricity of the Orbits of Binary Stars 151
The Atmospheres of Celestial Bodies ... 192
The Life-History of Stars 236

Moon—

Its Atmosphere; article on 50
Evidence as to the Existence of Water Action upon the Moon 115

Mosses—

Papers on British Mosses; by Lord Justice Fry 4, 21, 41, 61

Nebula—

What is a Nebula? by A. C. Ranyard 131, 191

Nebulæ—

On Planetary Nebulæ; by Miss A. M. Clerke 148
General Brightness of 131
Transparency and Density of 192

Nebular Hypothesis—

The Nebulæ observed in the Heavens have probably issued from the Stars they surround 192

Nebulous Stars—

Notes on the Nebulosity occasionally observed about some Variable Stars 52

Noble, B.—

On Square and Cube Numbers 13
Defence of Statement by Sir John Herschel 53

Noble, Capt. William—

Letter on the Inherent Light of Jupiter ... 51

PAGE

Nova Auriga—

The New Star in Auriga; article by E. W. Maunder 108
Theory as to; article by A. C. Ranyard ... 110

Peal, S. E.—

Can a Planet be finally Surfaced without a Sedimentary Rock Series? 114
Are the Lunar Clefts "River Beds" or Fractures of the Crust? 171

Pediculi—

On Human; by E. A. Butler 16
On those of the Eagle and the Pigeon ... 14

Peek, Cuthbert E.—

On the Nebulous appearance of some Variable Stars 52

Phosphorus—

Article on; by Vaughan Cornish 107

Pickering, Prof. W. H.—

Letter on the Glacial Period and the Planet Mars 113
Can a Planet absorb its Oceans without having its surface temperature lowered? 193

Prominence-like-

Structures seen in photographs of Swift's Comet 230

Prominences—

Photographs of Solar Prominences; by Prof. Geo. E. Hale 169

Radiometry—

By A. Jameson 138

Ranyard, A. Cowper—

Faces in the Sky 11
On the Connection between Earthquakes and Barometric Pressure 13
On the Comparative Sharpness of the Photographic Images of Red and White Stars ... 14
The Moon's Atmosphere 50
Note on the Invisibility of Jupiter's Satellites during Eclipse 51
The Connection between Sunspots and Magnetic Storms 70
Temporary Stars, Theory as to Cause of ... 110
Note as to Structure in Photographs of Swift's Comet 113
On a Mean Time Sundial 133
On Lightning Photographs 149

PAGE

Ranyard, A. Cowper—*continued.*

Note as to the time elapsed since the Separation of the Earth from the Sun 162
On some Recent Advances in the Study of Solar Prominences and Faculæ 169
On the Cause of the Changes in the Brightness of the Nova Aurigæ 170
Note as to the Discoveries of the Rev. John Michell 191
What is a Nebula? 131, 191
Note as to the Temperature of Mars . . 194
On the Forms of Comets' Tails 229
Note on Homer Lane's Theory as to the Increase of Heat of a Gaseous Sphere contracting under Gravity 237

Repulsion—

Probable Explanation of the Repulsion of Matter in Comets' Tails 231

Rodwell, John M.—

Pediculi of the Eagle and Pigeon 14

Ruminants—

Article by R. Lydekker on Ruminants and their Distribution 152

Runaway Stars—

Note by A. C. Ranyard 49

Russell, H. C.—

Letter as to Photographs of Swift's Comet ... 112

Sadler, Herbert—

The Face of the Sky for each Month.

Sawer, J. Ch.—

Camphire and Camphor 55

See, T. J. J.—

On the Origin of Binary Stars 81
Letter as to Tide Generating Force 114
Note on the Cause of the Eccentricity of the Orbits of Double Stars 132

Seeley, Prof. H. G.—

His Discovery in South Africa of Fossil Bones of Gigantic Salamander 231

Smith, J. Pentland—

The Feeding of a Plant 134
On Grasses 185

Solar Cluster—

Discussion as to the Probable Existence of 49, 73

PAGE

Solar Type Stars—

Have on the average Larger Proper Motions than Sirian Stars. Note by A. C. Ranyard 50
Letter on the Subject; by W. H. S. Monck ... 72

Stas, Jean Servais—

Chemical Researches of; Paper by Vaughan Cornish 74

Stellar Spectra—

Letter from W. H. S. Monck 51
Letter from J. E. Gore 70

Stewart, J. J.—

Some Practical Applications of Electricity ... 124

St. Gervais—

The Disaster at; by Lord Justice Fry ... 201

Sundial—

A Meantime Sundial, invented by Major-General J. R. Oliver 133

Sunspots—

The Great Sunspot and its Influence 68, 89
The connection between Sunspots and Magnetic Storms... 70
On the Distribution of Sunspots in Solar Latitude; by E. W. Maunder 128

Sutton, John Richard—

The Rev. John Michell, Astronomer and Geologist 188, 206
On the distribution of Stars in the Milky Way 224

Swift's Comet—

Letter from H. C. Russell as to photographs of 112

Taylor, Canon Isaac—

A Gossip on Ghost-names 3

Temperature—

Irregular increase of, in descending through the Stratified Rocks... 72

Transparency—

On the Evidence as to the Transparency of Nebulæ 191

Tutt, J. W.—

Notice of his book, "Melanism and Melanochroism in British Lepidoptera" 12

Velocity—

With which a body must be projected from the Moon to reach the Earth 12

Wallace, Alfred Russel—

Notice of his book, "Island Life" 151

Wilson, The Rev. Alex. S.—

Article on the Flower of Mahomet 111

Yerkes, Chas. T.—

Gift of great Telescope to the University of Chicago 212

XUM

INDEX OF THE PRINCIPAL ILLUSTRATIONS.

PAGE

Aard-Vark—
The Ethiopian Aard-Vark ... 224

Ant—
Worker of Wood Ant 27
Slave-holding Ant (female) ... 76

Antlers—
Of Red and Sambar Deer 155

Armadillo—
The Three Banded Armadillo ... 221

Atlantic—
Maps showing Currents and Seaweed of the North Atlantic ...156-7

Ball Lightning—
Photograph by W. F. Dunn, believed by him to represent Ball Lightning... 149

Cañon—
Photographic View of Inner Gorge of Toroweap 29
Photographic Views of Grand Cañon 8

Cassini, Dominic—
Beautiful Woman's Face in his Map of the Moon 11

Chillingham Cattle—
Woodcut showing White Cattle of Chillingham Park 154

Comet—
Photographs of Swift's Comet by H. C. Russell 113
Photographs of, by Prof. E. E. Barnard 229

Curves—
Illustrating the Drinking Habits and Trade of England 233

Earthquake—
Photograph of Scene on the Banks of the Biwajima River after Earthquake of 27th October, 1891 88

Egg—
Of *Pediculus capitis* 16

Electric Lamp—
Forms of Electric Lamps 125

Elephant—
Molar Tooth of Indian and African Elephant 65
Skeleton of Fore Foot of Elephant 47

Face—
Photographic Process Block showing Face in Mr. Barnard's Photograph of a Portion of the Milky Way in Sagittarius 11

PAGE

Faculæ—
Photograph taken by Prof. Geo. E. Hale showing Faculæ on Sun's Surface 169

Flint Implements—
Rough Stone Axes 195

Gazelle—
Horns of a Gazelle 154

Glacier—
Photograph of Great Holes in the Têtes Rousses Glacier 202

Gouter—
Outline of the Aiguille du Gouter 203

Grand Cañon—
Photographic Views of 8
Dykes in the Wall of 31

Kaibab Plateau—
Pinnacles in the Grand Cañon District 9

Kanab Cañon—
Pinnacle of Red Wall Limestone... 8

Leaf Butterfly—
Drawing of, after Wallace... ... 122

Lick Telescope—
Eye-piece End of the 149

Lightning—
Photograph showing Three Successive Flashes 149

Lunar Clefts—
Charts showing Clefts about the Mare Serenitatis and certain Lunar Craters 171-2

Magnetic Storm—
Curves drawn by Magnetograph at Greenwich, 12th to 14th February, 1892 92

Mammoth—
Skeleton of Siberian Mammoth ... 47

Marble Cañon—
Cliffs of the Marble Cañon ... 30

Mastodon—
Upper Molar Tooth of 65

Mean Time Dial—
Devised by Major-General Oliver 133

Milky Way—
Region about β Cygni photographed by Dr. Max Wolf 131
Region about ζ Cephei photographed by Dr. Max Wolf ... 192

PAGE

Moon—
Photograph of Southern Portion of the Moon when 167 hours old, by the Brothers Henry 50

Niches—
In the Red Wall Limestone, Grand Cañon 32

Nova Aurigæ—
Photograph of Spectrum of, by Prof. E. C. Pickering 110
Photographic Map showing Place of the Nova 110

Peat Bog—
Section of a Peat Bog showing Roots of Trees 61

Pediculus—
Crab Louse 17

Pichiciago—
An Armadillo of the Argentine ... 223

Prominences—
Photograph of a Solar Prominence taken by Prof. Geo. E. Hale ... 169

Radiometers—
Different Forms of ... 138, 177, 178

Shark—
Skeleton of an Extinct Shark ... 175

Sphagnum Cuspidatum—
Showing Young Plants at Ends of Branches 21

Sphagnum—
Leaf of *Sphagnum acutifolium* ... 41
Lateral Branches of 42

St. Gervais—
Map of the District surrounding St. Gervais 201
Photographs of St. Gervais before and after the Disaster 204

Sunspot—
Photograph by Dr. J. Janssen of Sunspot of the Maximum Type, 1st June, 1881 70
Photograph of Great Sunspot seen 13th February, 1892 70

Sunspots—
Diagrams showing the Zones in which Spots are developed at Various Parts of the Sunspot Period 128

Swift's Comet—
Block from Photograph by H. C. Russell 113
Photograph of, by Prof. E. E. Barnard 229

Vishnu's Temple—
Horizontal Stratification, Grand Cañon District 10
